

IN THE ABSTRACT

Please amend the Abstract on page 57, lines 2-14, as follows:

ABSTRACT OF THE DISCLOSURE

An electric double layer capacitor ~~having~~ includes, contained in a casing, an electrolyte, a positive electrode and a negative electrode each being an electrode containing carbon black, to form an electric double layer at the interface with the electrolyte, and a separator interposed between the positive electrode and the negative electrode. ~~wherein at~~  
At least one electrode of the positive electrode and the negative electrode has protruded portions or bent portions formed continuously in the height direction against the bottom face of the casing. ~~and~~ Further, a space due to the height of the protruded portions or the bent portions is formed between ~~said the~~ at least one electrode and the separator.
